

On June 8, 2015 GREENPOINT THERMOGRAPHY conducted a photo session with the following results.

GREENPOINT THERMOGRAPHY Dr. John Bartone [www.greenpointthermography.com](http://www.greenpointthermography.com)  
St Petersburg, Florida USA. GREENPOINT specializes in female breast cancer detection.

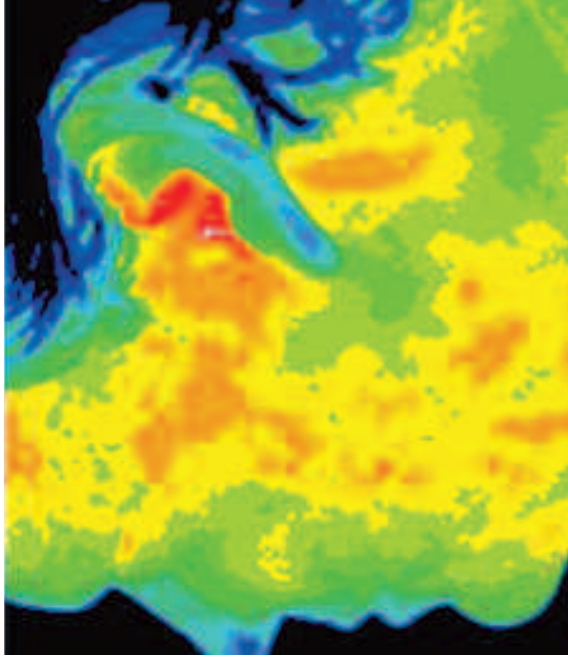

Thermophotography detects breast cancer by indicating a higher skin temperature in a cancer affected area in contrast to a breast without cancer where the temperature is visibly lower.

Thermographic headshot without cell phone involvement.

Thermographic headshot after a 10 minute cell phone call using SafestCellPhone™ unit attached to the iPhone 6

Thermographic headshot after a 10 minute cell phone call using an iPhone 6

From hot to cold:  
The darker the color - the colder the skin.

- red
- brown
- yellow
- light green
- dark green
- light blue
- dark blue
- black

The question is -

Does using a cell phone create heat on the skin ??

If yes is the case then this heat may also penetrate into the brain and create damage.
